Statistics Request Overall Description

On April 17, 2024, Research and Statistics received a request for an aggregate report of criminal charges disposed in Circuit Court statewide for calendar years (CY) 2014 through calendar year 2023.

The CourtNet database, which provides a summary of cases statewide, was queried for felony and misdemeanor charges disposed statewide in Circuit Court from 1/1/2014 to 12/31/2023.

Statistical Tables (23_RS6027)

Statistical Table 23_RS6019: Provides 53 pages of aggregations that display counts of felony and misdemeanor charges disposed statewide from CY 2014 through CY 2023.

Page 1: Provides a cross-tabulation that displays counts of criminal charges disposed grouped by disposition year and disposition group. Additionally, a count of distinct cases containing those charges is provided.

Page 2-53: Provide a cross-tabulation that displays counts of criminal charges disposed grouped by disposition year, charge county, and disposition group. Additionally, a count of distinct cases containing those charges is provided.

Statistical Analysis Considerations:

- Statistics represent a snapshot in time, as of the date the data was queried: 4/29/2024.
- A case may consist of one or multiple charges. The report's count of cases represents a distinct count of case numbers, regardless of the number of charges associated with the case.
- Counts of cases do not necessarily represent counts of unique individuals as a defendant may appear in multiple cases.
- Charges consist of all original and amended charges within a case counted separately.
- A case may consist of charges which fall under different groupings within a table. In this situation, a case is added to the case count for each grouping which applies to at least one charge within a case. Each subtotal displays the quantity of distinct cases and charges for

that grouping, causing subtotals of case counts to add up to a number greater than the actual overall total.

* Data provided from the CourtNet database.

* Counts of cases do not represent counts of individual defendants as the same defendant may appear in multiple cases.

* A case may consist of charges which fall under different groupings within a table. In this situation, a case is added to the case count for each grouping which applies to at least one charge within a case. Each subtotal displays the quantity of distinct cases and charges for that grouping, causing subtotals of case counts to add up to a number greater than the actual overall total.

* Data provided from the CourtNet database.

* Counts of cases do not represent counts of individual defendants as the same defendant may appear in multiple cases.

* A case may consist of charges which fall under different groupings within a table. In this situation, a case is added to the case count for each grouping which applies to at least one charge within a case. Each subtotal displays the quantity of distinct cases and charges for that grouping, causing subtotals of case counts to add up to a number greater than the actual overall total.

* Data provided from the CourtNet database.

* Counts of cases do not represent counts of individual defendants as the same defendant may appear in multiple cases.

* A case may consist of charges which fall under different groupings within a table. In this situation, a case is added to the case count for each grouping which applies to at least one charge within a case. Each subtotal displays the quantity of distinct cases and charges for that grouping, causing subtotals of case counts to add up to a number greater than the actual overall total.

* Data provided from the CourtNet database.

* Counts of cases do not represent counts of individual defendants as the same defendant may appear in multiple cases.

* A case may consist of charges which fall under different groupings within a table. In this situation, a case is added to the case count for each grouping which applies to at least one charge within a case. Each subtotal displays the quantity of distinct cases and charges for that grouping, causing subtotals of case counts to add up to a number greater than the actual overall total.

* Data provided from the CourtNet database.

* Counts of cases do not represent counts of individual defendants as the same defendant may appear in multiple cases.

* A case may consist of charges which fall under different groupings within a table. In this situation, a case is added to the case count for each grouping which applies to at least one charge within a case. Each subtotal displays the quantity of distinct cases and charges for that grouping, causing subtotals of case counts to add up to a number greater than the actual overall total.

* Data provided from the CourtNet database.

* Counts of cases do not represent counts of individual defendants as the same defendant may appear in multiple cases.

* A case may consist of charges which fall under different groupings within a table. In this situation, a case is added to the case count for each grouping which applies to at least one charge within a case. Each subtotal displays the quantity of distinct cases and charges for that grouping, causing subtotals of case counts to add up to a number greater than the actual overall total.

* Data provided from the CourtNet database.

* Counts of cases do not represent counts of individual defendants as the same defendant may appear in multiple cases.

* A case may consist of charges which fall under different groupings within a table. In this situation, a case is added to the case count for each grouping which applies to at least one charge within a case. Each subtotal displays the quantity of distinct cases and charges for that grouping, causing subtotals of case counts to add up to a number greater than the actual overall total.

* Data provided from the CourtNet database.

* Counts of cases do not represent counts of individual defendants as the same defendant may appear in multiple cases.

* A case may consist of charges which fall under different groupings within a table. In this situation, a case is added to the case count for each grouping which applies to at least one charge within a case. Each subtotal displays the quantity of distinct cases and charges for that grouping, causing subtotals of case counts to add up to a number greater than the actual overall total.

* A case may consist of charges which fall under different groupings within a table. In this situation, a case is added to the case count for each grouping which applies to at least one charge within a case. Each subtotal displays the quantity of distinct cases and charges for that grouping, causing subtotals of case counts to add up to a number greater than the actual overall total.
